MyMat

3DP Functional Filaments

**THE CHEMICAL
RESISTANCE FLEXIBLE
FILAMENT FOR
PROFESSIONAL
APPLICATIONS**

*Because what
really matters
is what you do...*

MYMAT KIMI

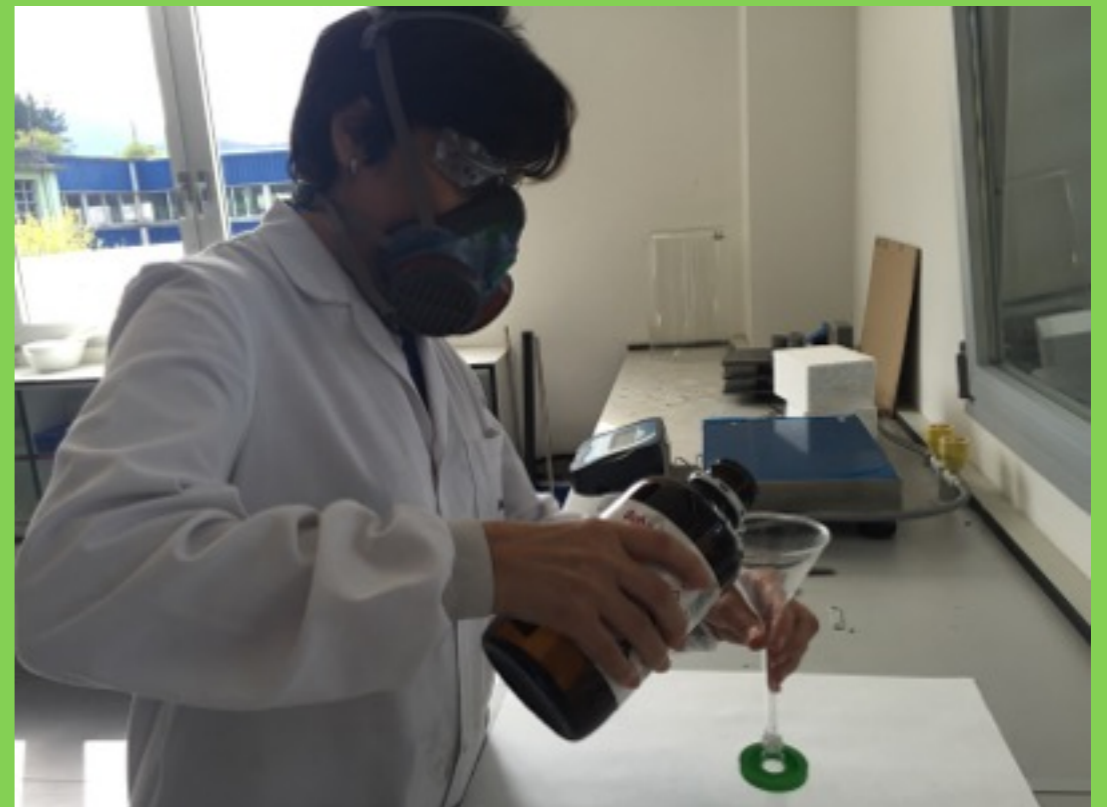

MyMat

3DP Functional Filaments

Substitution of **joints and flexible products** that require a good flexible behavior and **chemical resistance** is the perfect match for this filament.

Not only the chemical industry sectors require Kimi's chemical resistance. **Agriculture, makers as well as construction related jobs (plumbers...)** are the user focus for this product.

MYMAT KIMI

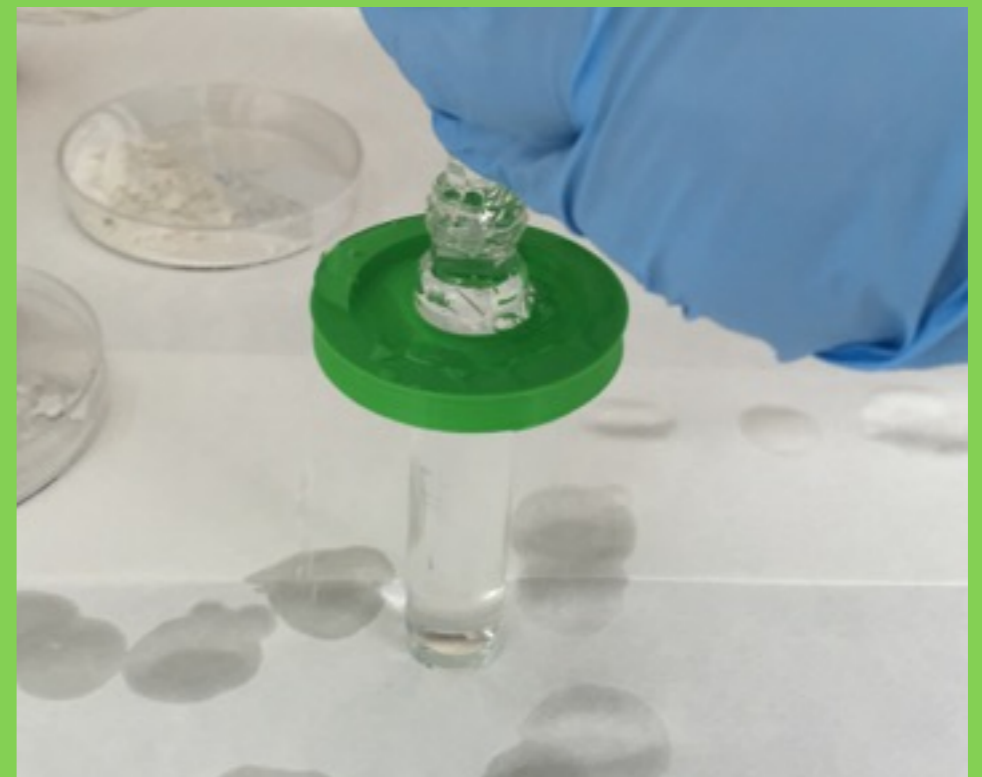

MyMat

3DP Functional Filaments

Laboratories and chemical industries need to have tools and working elements that fit the raw materials they produce. Kimi fits them.

“MYMAT_KIMI solves the needs for basic and alkaline solution contact products.”

MYMAT
KIMI

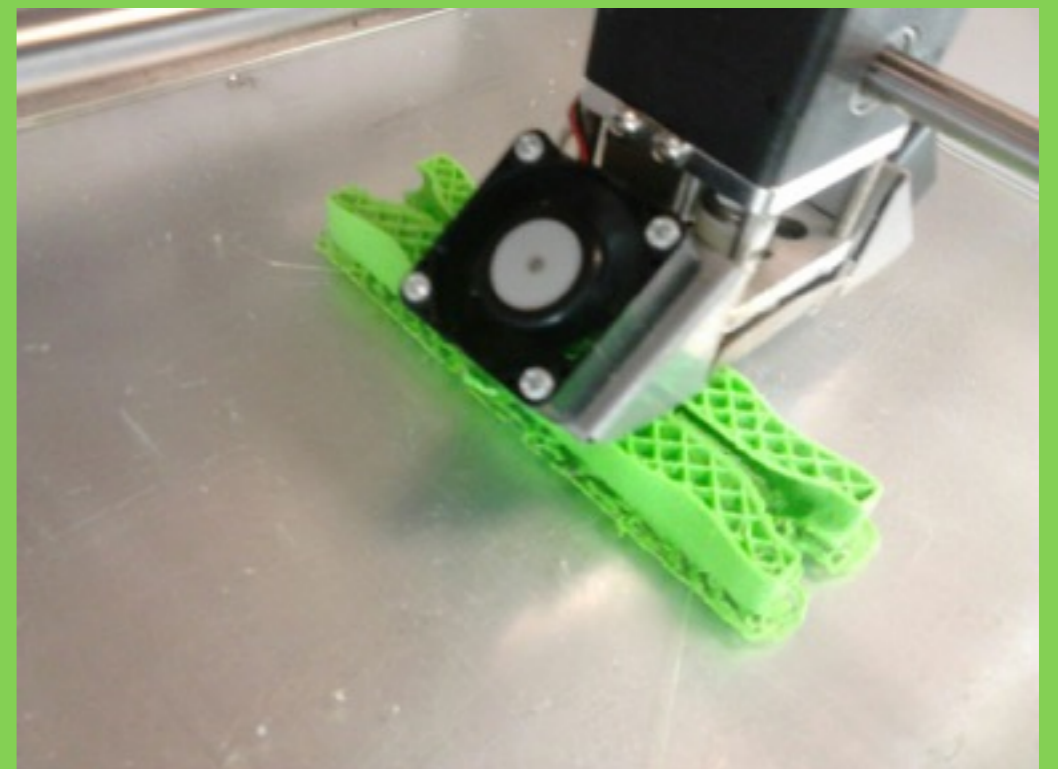

MyMat

3DP Functional Filaments

Antifreeze and alcohol
type liquids and solvents
resistance is very high.

KIMI IS GREEN because it
was created to **avoid & stand
contaminations, chemicals...**
and fulfill **outdoors resistance**
applications.

*Don't lose the
thread...*

**THE FOOD GRADE
FLEXIBLE FILAMENT FOR
PROFESSIONAL AND
AMUSEMENT
APPLICATIONS**
